

## The flexible, multi-user, web-based research & reporting tool for fleet professionals

### Easily create and share powerful fleet proposals to drive more sales

As a fleet professional, you're expected to know complete vehicle information in seconds. Carbook Pro delivers all the vehicle information you need in an intuitive and flexible web-based tool. Configure, research and share your work, quickly and easily.

Carbook Pro includes seven essential components critical for fleet professionals: Build a Vehicle, Standard Equipment, Vehicle Comparisons, Quote Worksheets, Report Templates, Vehicle List Management and Technical Specifications. License only the components your organization needs, or license the complete set and use the Management Console to turn components off and on depending on the needs and permissions of each user.

Carbook Pro is comprehensive and easy-to-use, giving you exactly the information you need to create powerful proposals to present your research to clients or stakeholders. And with a web-based platform and always up-to-date data, you can be up and running fast and have confidence that all information is timely and accurate.

### Features:

- Web-based application for instant start up
- Always the most up-to-date and accurate data
- Configure and research any vehicle in the US and Canada
- Standard equipment and technical specifications available for every vehicle
- Customizable vehicle lists to meet each user's need
- Dozens of built-in, customizable reports and worksheet templates
- Side-by-side and advantage-based comparisons
- Management console to manage users and permission-based functionality
- Available in English and French languages

### Benefits:

- Get up and running fast with a web-based platform
- Access the most accurate and current pricing and options for every vehicle
- Streamline your system by licensing only the components that your organization needs
- Have complete control over information with a management console that allows you to turn components on or off depending on the user
- Quickly produce professional reports and quote worksheets for clients and stakeholders
- Save time with instant access to vehicles and options and the ability to manage vehicle lists by client
