

A market leader in complete, customizable VIN decoding

Your business has unique vehicle description needs, so don't settle for a 'one size fits all' VIN decoder. Choose Automotive Description Service (ADS), and get the exact descriptive data you need.

Offered as a full or basic service, ADS is customizable to fit your business needs and streamline operations. The basic service delivers basic car, light truck, and motorcycle information that is ideal for quick inventory listings, validation and verification, and data normalization. The full version delivers all of the basic data, as well as the complete array of data points for the most comprehensive make, model, trim and equipment descriptions. If you have large batches of vehicles that you need to convert into detailed vehicle descriptions, use our batch processing system for a fast and easy way to get all the information you need.

Chrome Data also offers add-on modules for enhanced vehicle images and OEM Build Data, which is information from the vehicle manufacturer that fully describes a vehicle's specifications and feature content when the vehicle left the manufacturing plant.

With complete coverage for US and Canadian vehicle models back to 1981, and Chrome Data's high-quality VIN and new vehicle information, Chrome Data is able to deliver an unparalleled level of detail and accuracy on decoded VINs. Delivered through our streamlined web service interface, ADS can be implemented in virtually any type of application, and all descriptions include the Chrome Style ID for easy integration with other products.

You choose the service, the value-added modules and the data parameters that meet your unique business needs. We deliver the precise data through a seamless, cost-effective web service interface.

Features:

- Basic version delivers pared-down vehicle information
- Full version delivers a comprehensive array of data points
- Coverage for US and Canadian motorcycle models beginning with 2003
- Coverage for US and Canadian car and light duty truck models back to 1981
- Convert large batches of vehicles into rich detailed descriptions
- Add-on modules for enhanced images and OEM Build Data
- VINless decoding available using year, make, model and trim

Benefits:

- Streamlined web services interface
- Customizable data parameters
- Get exactly the VIN-decoder that meets your needs with basic and full versions
- Easily add enhanced images and OEM Build Data
- Access over 30 years of vehicle data and high quality VIN and new vehicle information
- Integrate easily with existing application
- Easily select how much or how little detail you want to display
- Streamline operations and save time by receiving exactly the descriptive data your business needs
